## Project Description:

Construction work on Mullingar Primary Care Centre started in July 2015 and was completed in Q3 2016. A new build, it is be one of the largest Primary Care Centres in the country comprising 5,000 square metres and approx. 120 car spaces. Occupants include The HSE, Tusla (The Child Protection Agency), two local GP practices, a pharmacy, a Diagnostic Centre and a coffee dock. In addition to its standard Primary Care Centre services of Community Nursing, Occupational Therapy and Physiotherapy, Speech and Language Therapy, Homecare Assistance, The HSE will also provide a Mental Health Clinic and Day Hospital, a Dental Unit and a Registration service.

"In a Primary Care Centre where cleanliness and patient comfort are paramount, an option which promotes anti-fungal resistance both in the fabric composition itself and the system by enabling us to swap fabrics in seconds, is fantastic, all the while eliminating centre downtime and patient distress due to maintenance.

From the initial consultation, through to the design process, manufacture and installation, we couldn't be happier with the service we received from Bloc Blinds. The fact that they offer the complete service from taheir HQ in Northern Ireland means the overall cost and process was simplified, more efficient and tailored to our needs, ensuring the end result was exactly what we wanted and delivered when we needed."

*"The fabric changer system offered by Bloc Blinds provides a level of flexibility which is simply not possible with standard roller blinds."*

*Pat Nolan, Director, Feasible*
